Silviu Valcu

Full-Stack Developer | .NET & Angular Enthusiast | Passionate About Tech, Automation & Microservices

Pontedassio, Liguria, Italia

Riepilogo

I'm a full-stack developer with hands-on experience building robust, scalable web applications using modern technologies like .NET, C#, Angular, and SQL . I thrive in fast-paced environments where I can take ownership of problems and contribute to delivering high-quality, maintainable solutions.

I bring a curious mindset and a strong passion for technology, always looking for ways to improve, automate, and optimize both code and workflows. I enjoy collaborating in cross-functional teams, participating in code reviews, and mentoring others when I can. My background and interests extend beyond code — I love understanding how complex systems work and applying that knowledge to software architecture and design.

Outside of work, I'm passionate about cycling, vector design, and sharing technical knowledge. I believe in continuous learning and enjoy teaching others about development, new tools, and best practices.

I'm deeply fascinated by emerging technologies, automation, and the intersection between hardware and software. I love exploring areas like smart home systems (Z-Wave), Lua scripting, and energy optimization — not just as a hobby, but as a way to build useful, efficient tools that improve everyday life.

Esperienza

Blazar Group
Sviluppatore .Net e Mobile
ottobre 2023 - Present (1 anno 9 mesi)

Software Consultant at Reply | Jan 2025 - now | .Net Backend Developer

Software Consultant at Reply | October 2023 - Jan 2025 | Angular webapp development & Dynamics365

TPI Srl
Apprendista programmatore
ottobre 2018 - ottobre 2023 (5 anni 1 mese)
Imperia, Italia

Software development with C# language, EF, EFCore, .NetCore and the newest Balzor. I use VS IDE.

This work is very stimulating and motivating: every day is an adventure, full of challenges and satisfactions that are achieved not only individually but also in team.
Everything is possible: analysis, design, development. ♥
I have the opportunity to access the latest technology on the market and our work sees the use of preview tools. I love to develop tomorrow's technologies, every problem overcome makes me feel alive.

MDM snc di Melchiorre e Moraglia
Junior Sales Manager
settembre 2015 - ottobre 2018 (3 anni 2 mesi)
Imperia, Italia

During this period I was able to manage an ecommerce dealing with the procurement of materials, billing and technical support.
I learned what Z-wave technology was, how it works and how to use it for the design of smarthomes and solve problems by consulting with engineers, architects and electricians throughout Italy.
I also learned how the prestashop platform works and its back and front office management.
